RADIOBIOLOGY

Applied to radiotherapy

Radiobiological assessment of permanent implants using tumour repopulation factors in the linear-quadratic model, 241

Precipitation of radiation injury in kidney epithelium reveals a high fractionation sensitivity (Short communication), 283

Incorporating the time factor into the linear-quadratic model (Correspondence), 296

Stem-cell depletion and grid therapy (Correspondence), 386

Biological equivalence between fractionated radiotherapy treatments (Correspondence), 565

The linear quadratic formula and progress in fractionated radiotherapy (Review article), 679

Biological equivalence between frctionated radiotherapy treatments using the linear-quadratic model (Correspondence), 873

Residual radiation-induced injury in dermal tissue: implications for retreatment, 915

Ten-year results of a post-operative trial: NSD and LQ correspondence (Correspondence), 954

Kinetics of recovery from sublethal radiation damage (Correspondence), 1107

Effects of radiation quality

Changes in biological effectiveness of the neutron beam at Clatterbridge (62 MeV p on Be) measured with cells *in vitro*, 344

Changes in relative biological effectiveness with depth of neutron beams (Correspondence), 765

Fractionation studies

Cell kinetic changes in the follicular epithelium of pig skin after irradiation with single and fractionated doses of X rays, 41

Effects of inhibition of intercellular communication on repair of damage induced by ionizing radiation (Short communication), 281

First interim progress report on the second British Institute of Radiology fractionation study: short versus long overall treatment times for radiotherapy of carcinoma of the laryngo-pharynx, 450

Biological equivalence between fractionated radiotherapy treatments (Correspondence), 565

The linear quadratic formula and progress in fractionated radiotherapy (Review article), 679

Sublethal damage repair and radiosensitivity of human squamous cell carcinoma cells grown with different culture techniques, 1084

Hyperthermia and irradiation

The potential value of hyperthermia-induced high fever in the management of HIV infection (Correspondence), 1112

Sensitizers and protectors

Experimental intra-arterial administration of SR-2508 in the rabbit V2 carcinoma model, 234

Tetrachlorodecaoxygen anion complex treatment after localized X irradiation of the rat colon (Short communication), 381

Radiation toxicity of indium-111-2-mercaptopyridine-N-oxide on HeLa S-3 cells, 468

Variation of tumour radiosensitivity with time after anaesthetic, 932

Modulation in the radiosensitivity of MCF-7 human breast carcinoma cells by 17B-estradiol and tamoxifen, 1079

Other studies

Functional changes in the irradiated rat ureter: assessment by transit-time renography (Short communication), 87

Alteration of cardiac myosin isozymes after whole-body irradiation (Short communication), 189

Effects of inhibition of intercellular communication on repair of damage induced by ionizing radiation (Short communication), 281

Precipitation of radiation injury in kidney epithelium reveals a high fractionation sensitivity (Short communication), 283

Radiation-induced cell death by chromatin loss, 338

Structure-function analysis of angiotensin-converting enzyme inhibitors as modifiers of radiation-induced pulmonary endothelial dysfunction in rats, 348

Tetrachlorodecaoxygen anion complex treatment after localized X irradiation of the rat colon (Short communication), 381

In vivo viability of ^{111}In-labelled granulocytes demonstrated in a sham-dialysis model, 463

Radiation toxicity of indium-111-2-mercaptopyridine-N-oxide on HeLa S-3 cells, 468

Atypical radiological features of beta-glucuronidase deficiency (mucopolysaccharidosis VII) occurring in an elderly patient from an inbred kindred (Case report), 493

The production of chromosome structural changes by radiation: an update of Lea, 1946, Chapter VI (Review article), 507

The effects of single doses of X rays on the mechanical properties of pig skin *in vivo*, 830

Soft-tissue effects of biliary extracorporeal shockwave lithotripsy in swine, 843

Radiation doses in extracorporeal shock wave lithotripsy, 921

Sublethal damage repair and radiosensitivity of human squamous cell carcinoma cells grown with different culture techniques, 1084

HYPERTHERMIA

The potential value of hyperthermia-induced high fever in the management of HIV infection (Correspondence), 1112

HAZARDS AND RADIATION PROTECTION

Some indicative parameters on diagnostic radiology in Spain: first dose estimations, 20

Diagnostic radiation, pregnancy and termination (Correspondence), 92

Costing imaging procedures (Correspondence), 94

Patient doses from computed tomography in Manitoba from 1977 to 1987, 138

Possibility of retrospective dosimetry for persons accidentally exposed to ionizing radiation using electron spin resonance of sugar and mother-of-pearl, 148

Films, screens and cassettes for mammography, 163

Radiation dose to urological surgeons during X-ray fluoroscopy for percutaneous stone extraction (Short communication), 185

Radiation dose to neonates on a Special Care Baby Unit, 230

The unseen radiation hazards of ultrasound (Correspondence), 295

Secretion of radioactivity in breast milk following administration of ^{123}I hippuran (Correspondence), 388
